

Point-of-sale signage installation instructions

Install the signage in this toolkit on your point-of-sale terminal to let your customers know about the speed and security of Visa payWave®.

How to apply the signage to your terminal

- 1** Remove the sign and plastic clips from the plastic bag (adhesive and non-adhesive clips are included).

- 2** Insert the edge of the sign into the clip until secure (use two clips if necessary).

- 3** Remove the protective layer of the clip adhesive (if using a non-adhesive clip, skip this step).

- 4** Line up the clip to the side of the terminal, making sure the sign is facing the customer. For adhesive clips, press in place for 5 seconds. For non-adhesive clips, hook onto the terminal or privacy shield.

How to remove adhesive clip

- 1** Carefully pull the clip off the terminal. This can be done by using a non-damaging scraper.

- 2** If glue residue is left on the terminal, test a small amount of paint thinner or glue remover on an inconspicuous portion of the unit to make sure that the mild solvent does not damage the unit. The mild solvent can then be used to soften and remove the residue.
